

ENVIRONMENTAL RACISM IN WATER

Snigdha Gurram
Seaside Sustainability

ENVIRONMENTAL RACISM

Communities of color that are disproportionately exposed to hazardous and unhealthy environmental conditions.

Some examples of these negative environmental outcomes are:

- Lack of clean water
- Oil extraction
- Hazardous waste

MORE THAN FLINT, MICHIGAN

The most well known case of environmental racism with water is Flint, Michigan. However there are many other cities, states, and countries that face this problem because of the same reason while some have a different problem behind their water quality issues.

JACKSON, MISSISSIPPI

Problem:

- Unhealthy water conditions
- Boil-Water Alert

Demographics (2024):

- Black/African American: 82.17%
- White: 15.07%
- 2 or more races: 1.66%
- Poverty rate: 25.93%

DETROIT, MICHIGAN

Problem:

- Poverty
- Water shut off

Demographics (2024):

- Black/ African American: 77.82%
- White: 12.22%
- 2 or more races: 4.23%
- Poverty rate: 31.51%

WATER POLLUTION IMPACT ON HEALTH

Water Pollution:

- Cholera
- Diarrhea
- Dysentery
- Hepatitis A
- Polio

ENVIRONMENTAL JUSTICE

To prevent environmental racism, there needs to be environmental justice.

Fair treatment of all people regardless of race, gender, income, and etc. As well as protecting everyone from environmental impacts, human health impacts, and equal access to a health environment.
