Watering Lawn/Garden

Watering lawns are the biggest water uses in home landscape

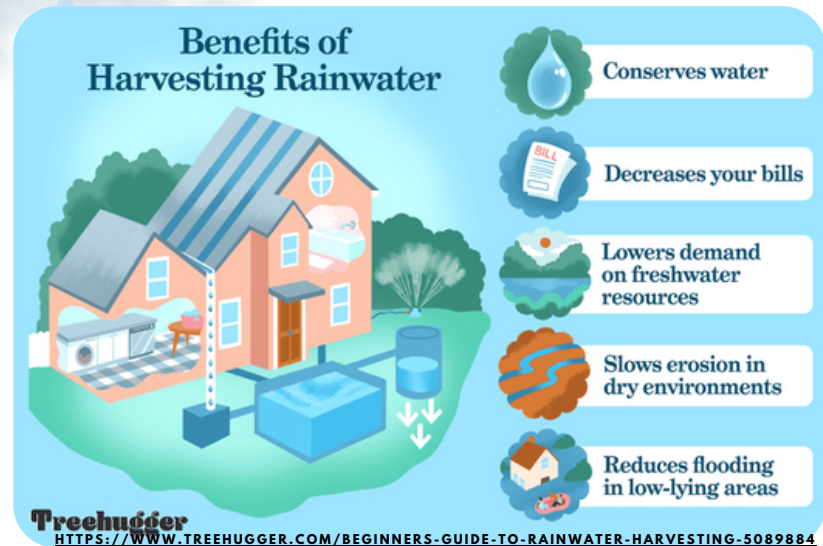

- Hot day: 1/2 inch to 1 inch of water per week
- Cool day: 1 inch to 1.5 inches of water per week

Different Ways to Collect Rainwater

- Rain Barrels
- “Dry” System
- “Wet” System
- Storage Tanks
- Rain Saucers

Household Uses

- Flushing Toilet
- Washing Clothes
- Cleaning Surfaces
- Filling Ponds or Pools
- Watering Lawn or Gardens

Benefits of Rainwater Use

- reduce stormwater runoff
- reduce storm's peak flow and velocity in bodies of water
- reduce energy use and carbon emission
- replenish groundwater supply
- reduce overdraw of groundwater
