EDUCATION

University of San Diego

Master of Science in Engineering, Sustainability, and Health

Expected January 2027

Online

San Jose State University

Bachelor of Science in Environmental Studies, Minor in Green Engineering

December 2023

San Jose, CA

SKILLS

- **Data & Analytics:** Python, SQL, Snowflake, Tableau, Power BI, Data Visualization, Technical Reporting
- **Environmental Expertise:** GIS, Climate Data Analysis, Environmental Impact Analysis, Sustainability Research, Life Cycle Assessment (LCA), ESG, EHS

RELEVANT EXPERIENCE

Peninsula Humane Society & SPCA

Wildlife Rehabilitation Intern

May 2026 - August 2026

Saratoga, CA

- Completed RVT-led training in rehabilitation fundamentals, first aid, critical care, diagnostics, release criteria, nutrition, wildlife medicine, and pharmacology
- Performed basic wildlife husbandry and animal care
- Assisted in vaccinations, oral medications, fecal float, subcutaneous fluids, blood smears, animal restraints, and blood draws

NeuralSeek

Agent Builder Intern

August 2025 - September 2025

San Diego, CA

- Advanced NeuralSeek's mission to make generative AI accessible by developing and deploying an AI agent in Python, improving response accuracy by 20%
- Analyzed thousands of user interactions to identify error patterns, building scripts to automate performance reporting and reduce manual QA time by 10+ hours weekly
- Partnered with engineers and data scientists to refine model outputs, strengthening the reliability of AI-driven decision support systems

Seaside Sustainability

Climate Action & Advocacy Fellow | Nature-Based Solutions Department Manager.

February 2023 - September 2025

Gloucester, MA

- Managed and analyzed environmental data across 7+ projects, producing datasets and technical reports to inform policy, advocacy, and public education campaigns
- Coordinated project planning and workflows across 5 sub-teams, improving communication and project completion by 50%
- Supported a 15-member team in delivering 35+ sustainability projects through project coordination, troubleshooting, and technical support
- Researched sustainable practices and environmental initiatives to guide project and advocacy strategies
- Led environmental justice discussions and campaigns focused on stakeholder education and engagement
- Researched and developed sustainability campaign content that reached 1,000+ readers

PROJECTS

Alviso Case Study | *Data Analysis, Environmental Justice and Restoration, EIA, GIS*

- Analyze historical and current environmental impacts, including groundwater pumping and flooding, on vulnerable human, wildlife, and ecological communities in Alviso, San Jose
- Apply GIS, data analysis, Microsoft Office Suite, and environmental impact assessment (EIA) concepts to investigate environmental justice, ecosystem degradation, and restoration strategies through research papers and visual presentations
