

Fashion waste

Technical

- difficult to separate fiber and recycle
- complicated process
- costly recycling technology

Non Technical

- sorting and collection problem
- overproduction / fast fashion
- lack of education to the public
- lack of responsibility on producers

Negative

Consequences

- lower value products
- chemical recycling causing microplastic or toxic stuff to release
- greenwashing
- textile waste being sent to Global South

Ways Forward

- sorting technology
- closed loop recycling
- eco designs
- single material products
- more responsibility on producers
- more initiatives
- slow fashion
